

Exciting changes coming to CLUB ILIA

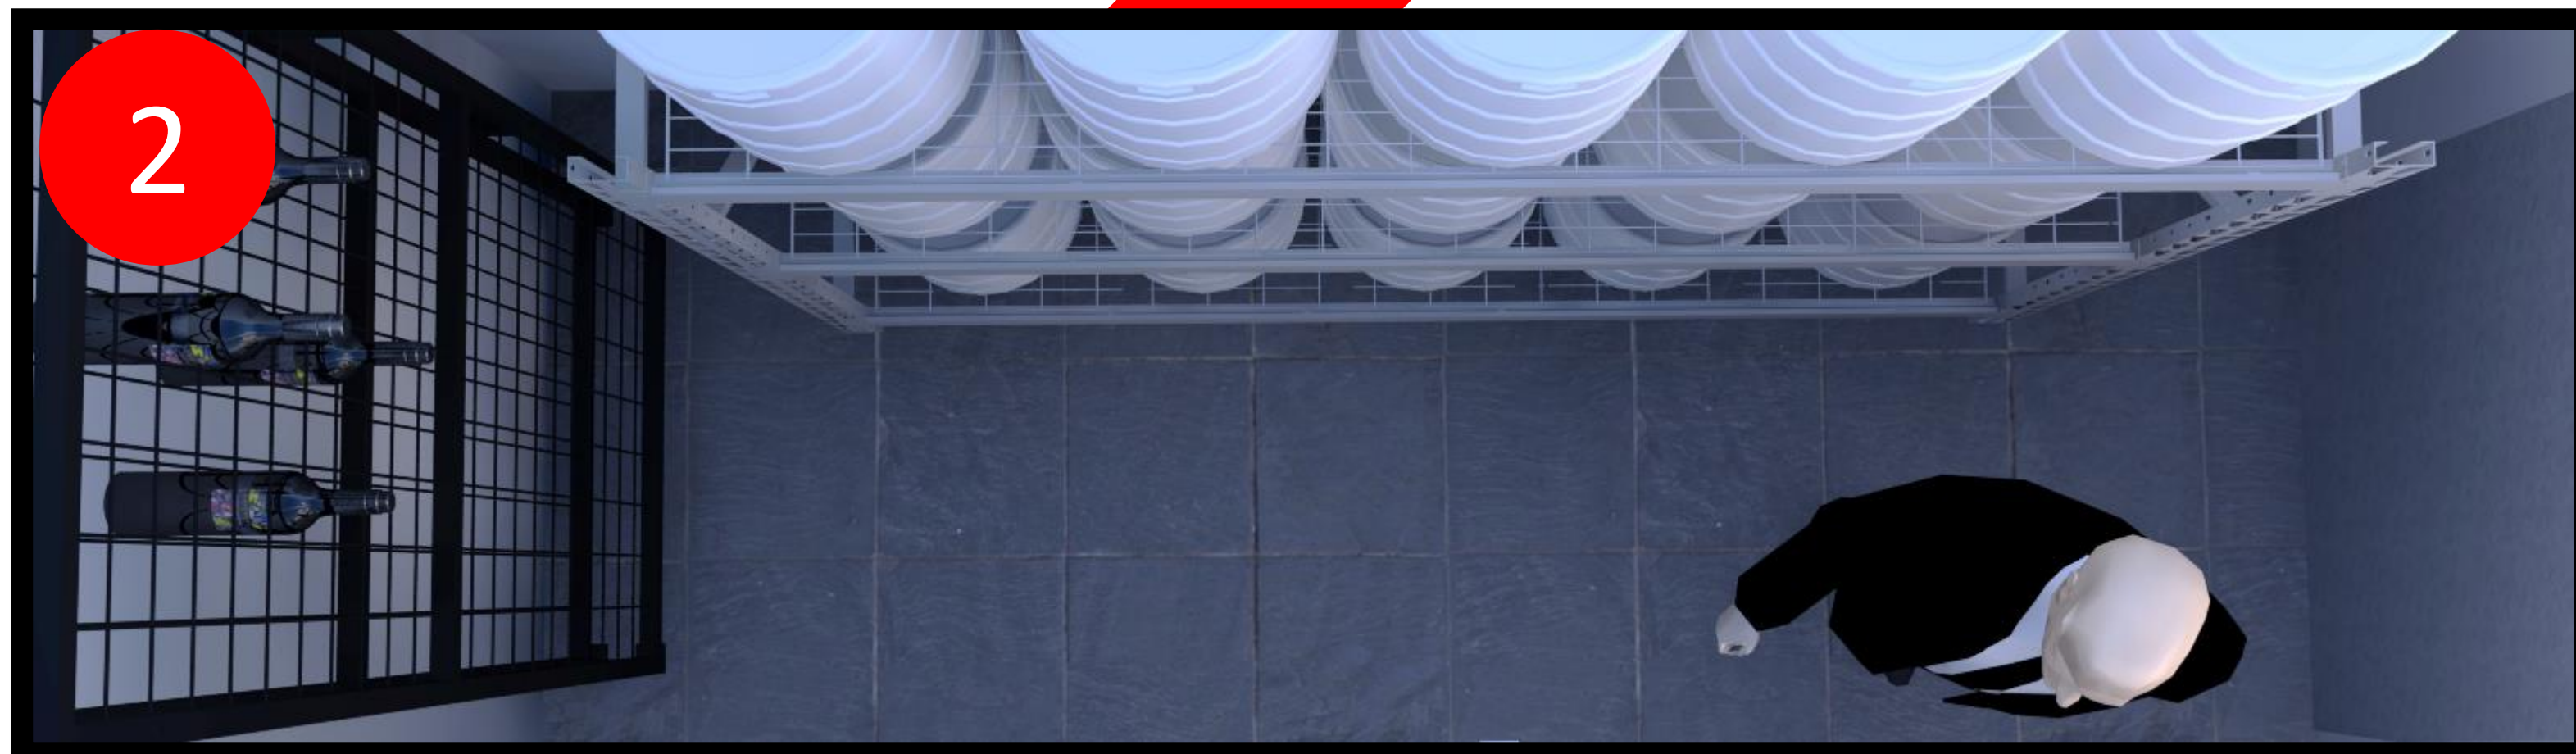

1

More Open

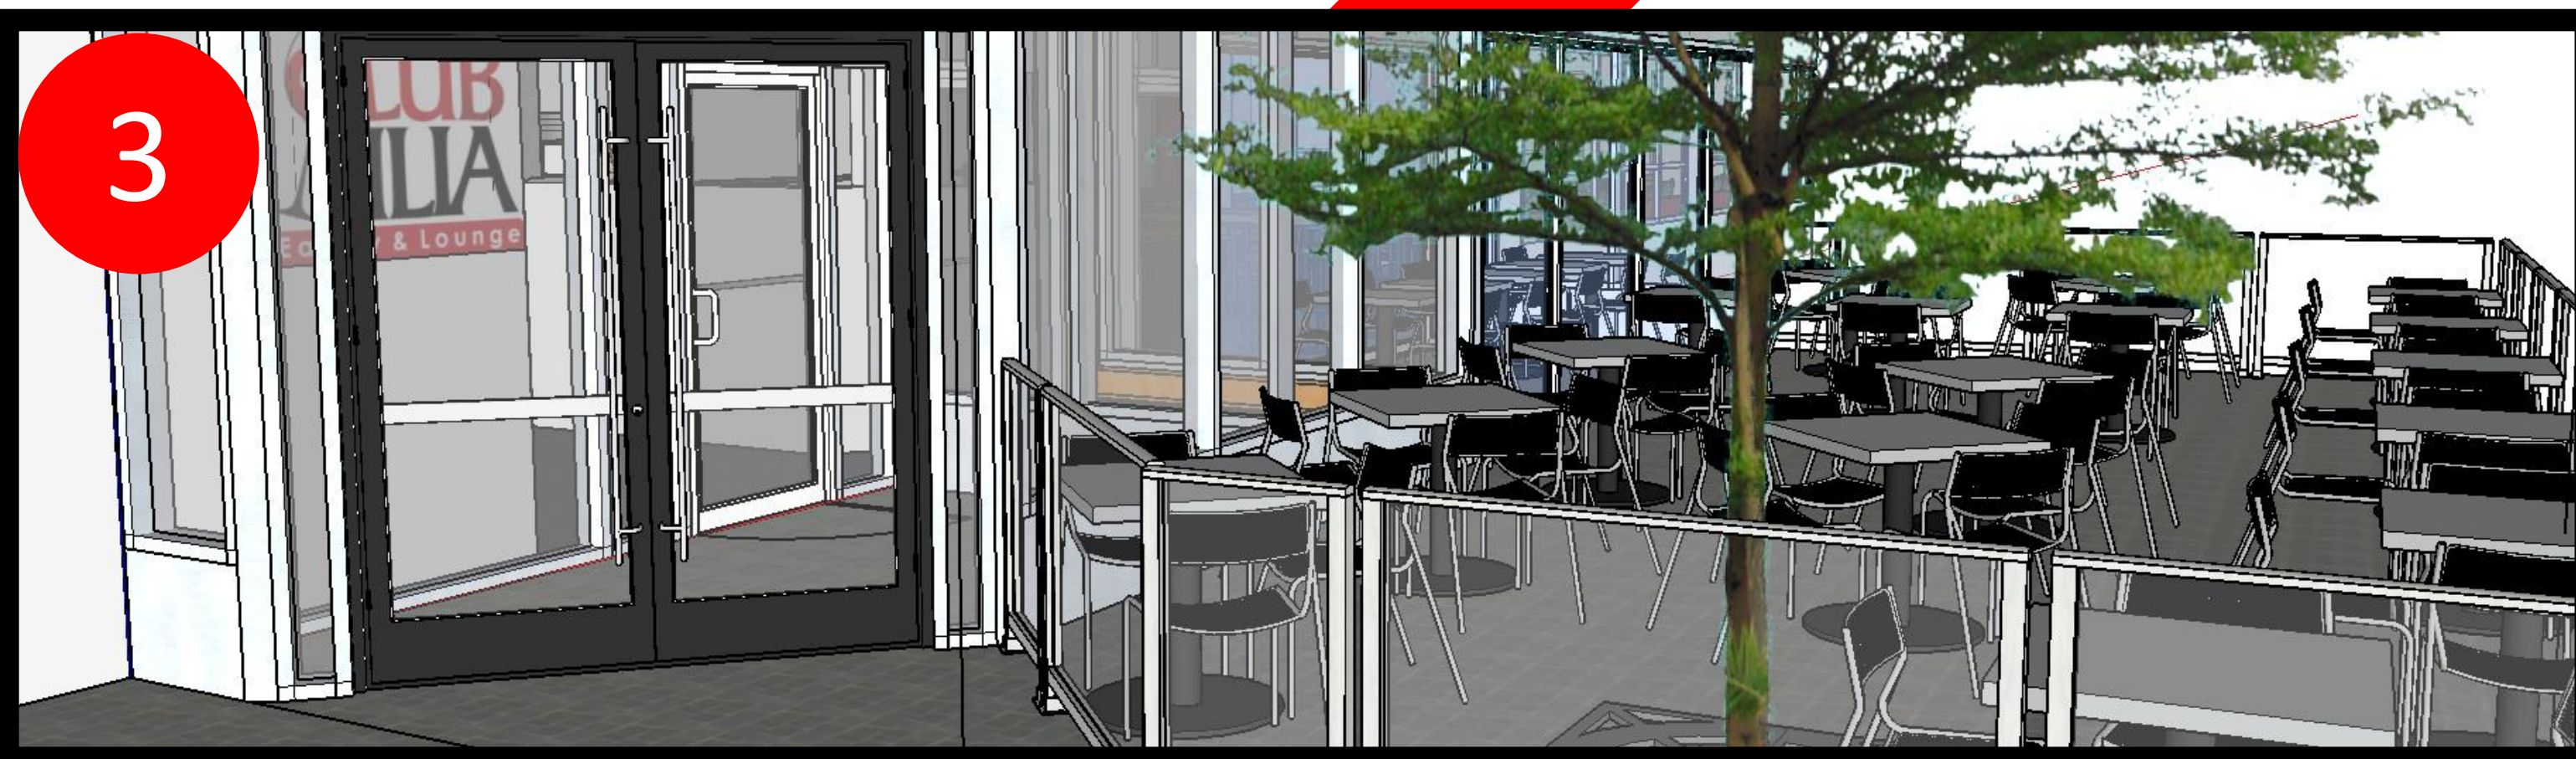

Walls are coming down.
The entrance now opens into the main dining room.

Locally Brewed

BC wines & craft beer by local brew masters help support our local economy. Club Ilia welcomes this trend and its new glass cooler features local kegs and wines.

2

3

Welcoming Entrance

No more waiting in the rain. We're adding seats to deal with the demand. To ease line-ups at peak times, a new vestibule keeps you warm and dry.

More bar seating

New bar height tables and seats allow more free-flow interaction among groups. Smaller tables bring you closer to your friends when conversations get louder.

4

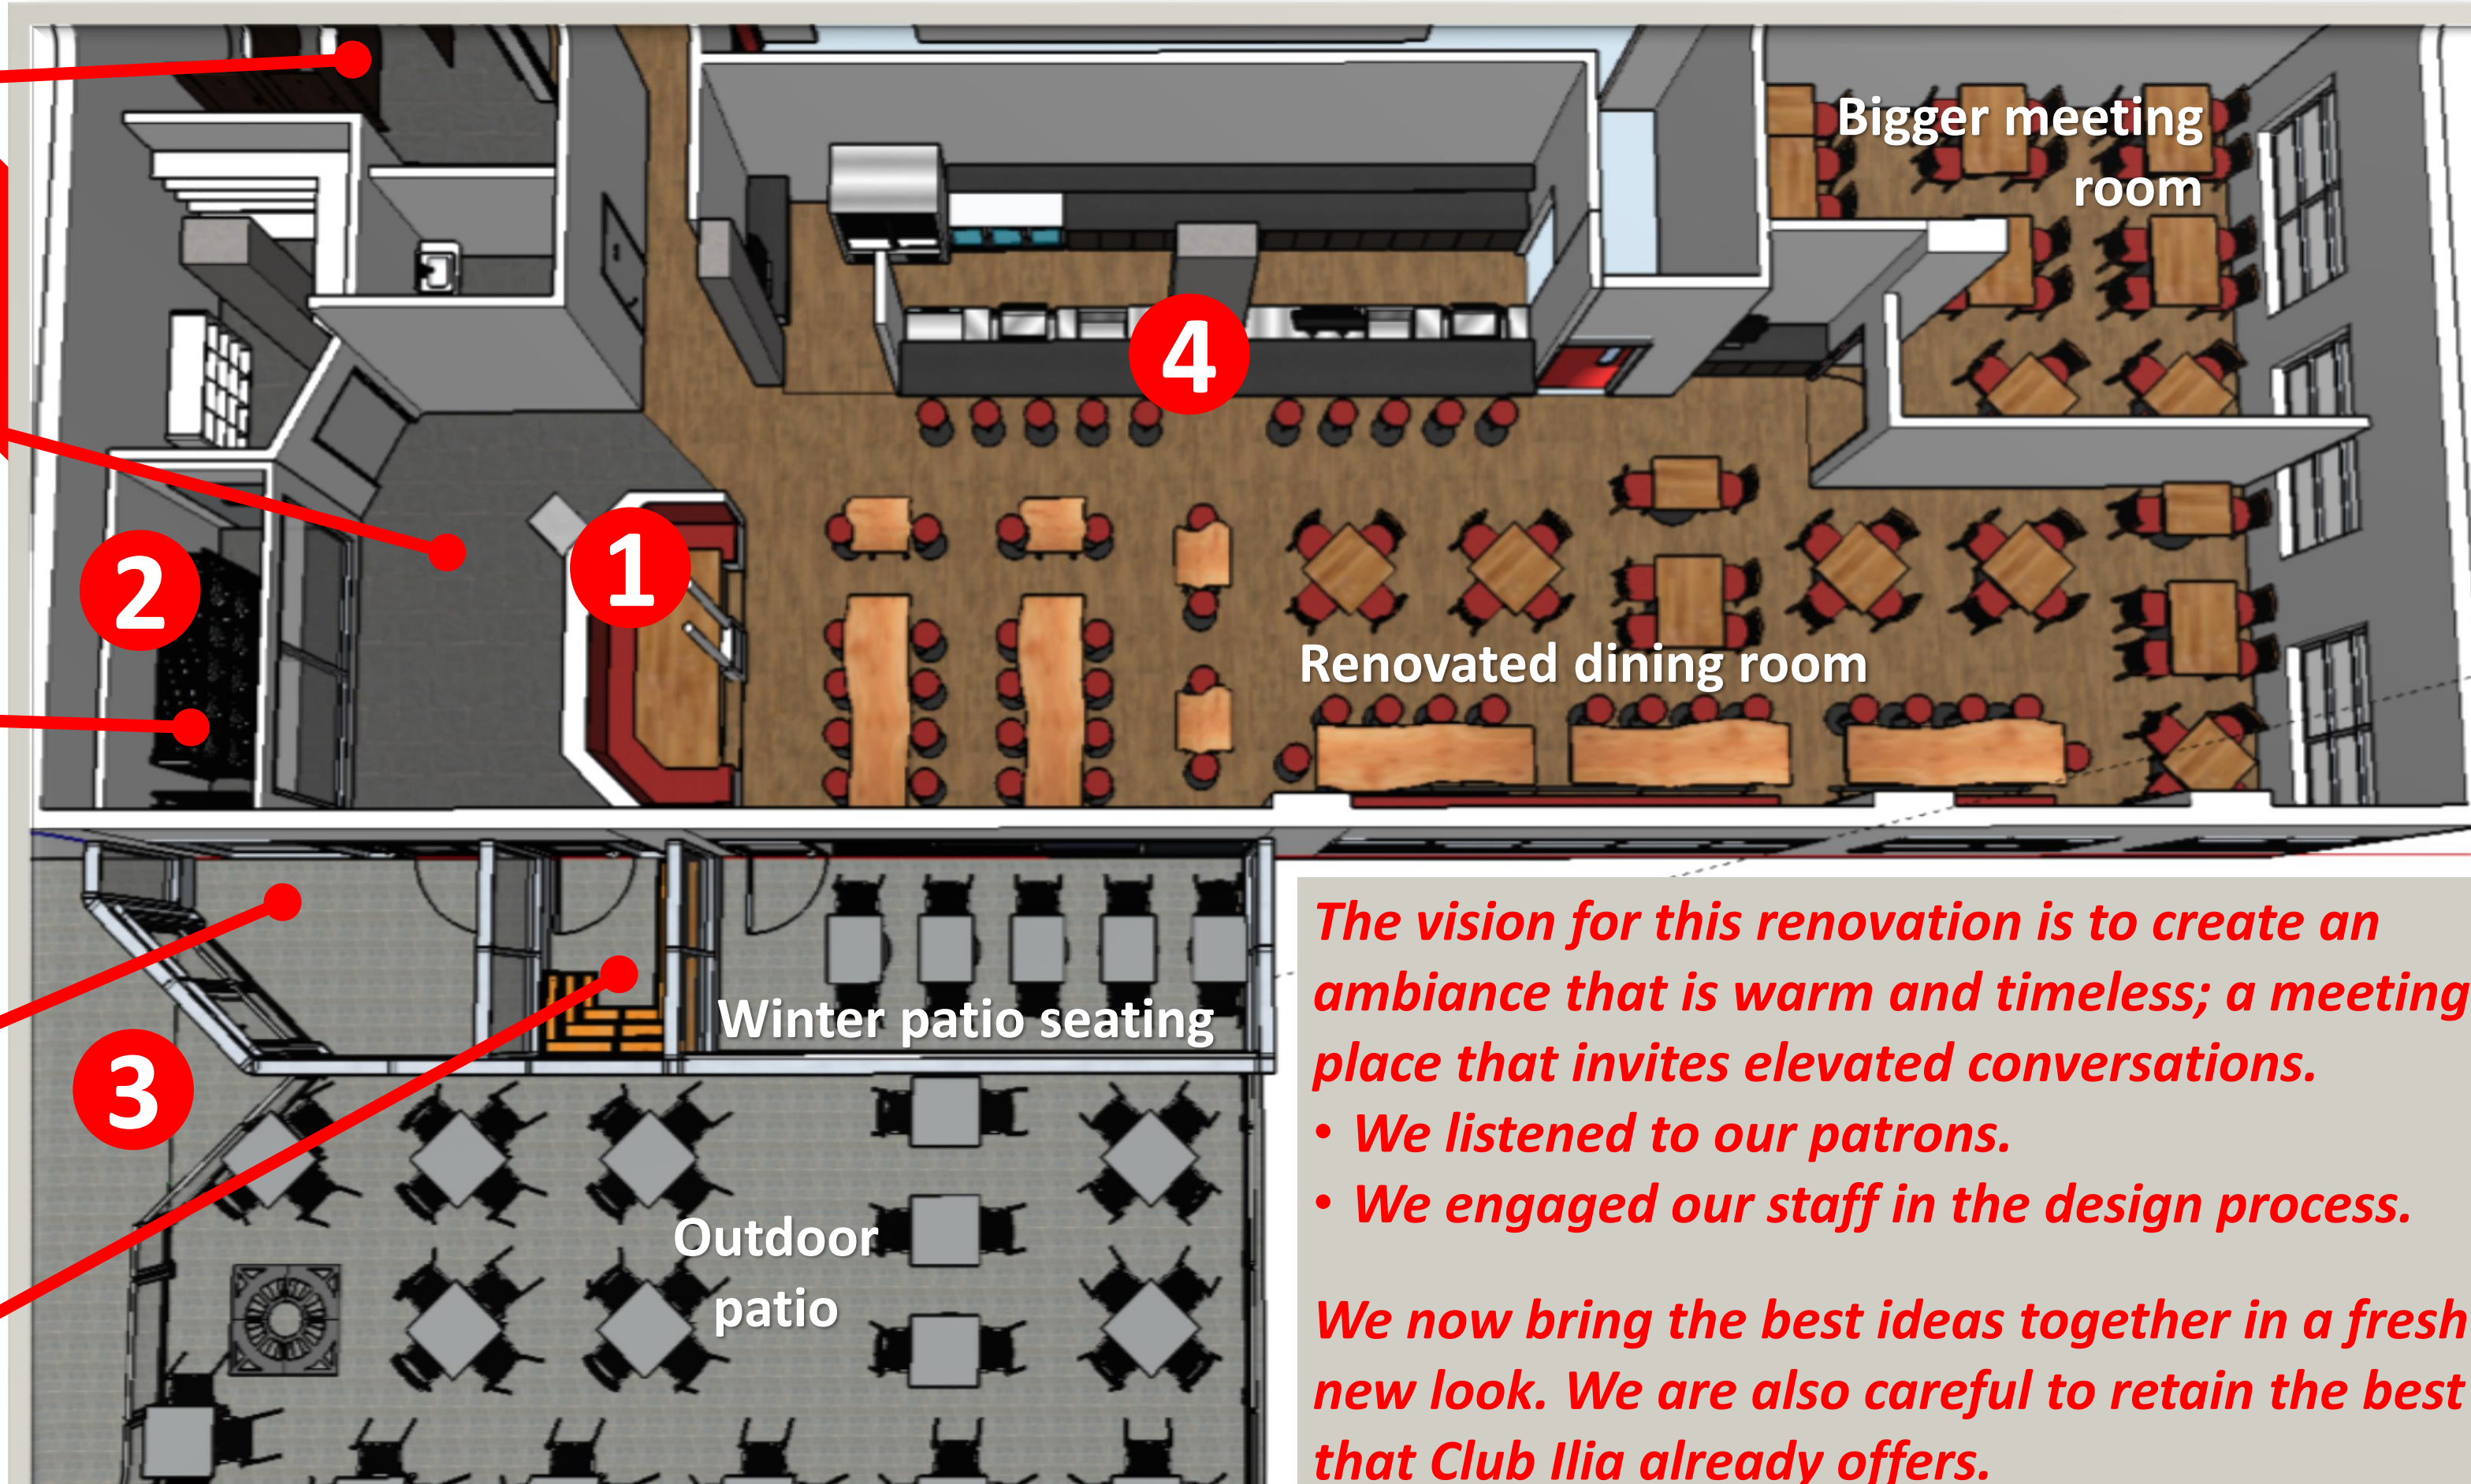

Renovated washrooms

Reception

New beer & wine cooler

New Vestibule

New Greenhouse

Private Meetings

The private dining room is now bigger.

Taking down the back wall allows more light to come through and opens the view to the plaza and greenery below.

The vision for this renovation is to create an ambiance that is warm and timeless; a meeting place that invites elevated conversations.

- We listened to our patrons.
- We engaged our staff in the design process.

We now bring the best ideas together in a fresh new look. We are also careful to retain the best that Club Ilia already offers.

Club Ilia: where the SFU community meets

Fresh from the new Greenhouse

We're Growing!

Our space is not the only thing that's growing. We also want to grow our own fresh herbs and vegetables on site.

Our climate controlled mini-greenhouse will be steps away from our kitchen and minutes away from your plate. Can't find more fresh than that.

**Hydroponic
Water-wise**

**Organic
Health-wise**

Bigger, Warmer patio

We're proposing to expand the use of our patio during shoulder seasons with sliding doors. Enjoy a meal in October sunshine without the chill of a windy day.
